Esclarecimentos sobre a estatistica de Importação e Exportação

Importação

Sob esta designação são apenas mencionadas as mercadorias introduzidas do exterior da Republica, de origem exclusivamente estrangeira, não figurando, portanto, as mercadorias que constituem o movimento *interestadoal*, ou de cabotagem, pela falta absoluta de elementos para esse fim.

Os quadros ou tabellas da importação correspondem ao movimento geral, que abrange tanto as mercadorias entradas para consumo como as em *ser* nas alfandegas e as reexportadas.

Quantidades — As quantidades das mercadorias da importação referem-se ao peso liquido ou outra unidade declarada nas facturas consulares.

Valores — Os valores das mercadorias são ainda fornecidos pelas facturas consulares e se compõem de:

1.° Custo da mercadoria no paiz de procedencia ;

2.° Fretes e despezas até o porto de destino ;

3.° Valor livre a bordo no porto de destino, que é a somma dos anteriores.

A separação do custo facilita a comparação da nossa estatistica de importação com as de exportação de outros paizes para o Brazil.

Os valores da importação são especificados em ouro e tambem em moeda papel.

Os valores em ouro são obtidos pela reducção dos valores declarados nas facturas consulares, em moedas estrangeiras, a moeda brazileira ouro, ao par.

Os valores em moeda-papel representam a reducção desses valores ouro a papel ao cambio médio official, á vista, do mez correspondente, de conformidade com as taxas da tabella, á pagina 215.

Origem das mercadorias — A origem das mercadorias importadas é a declarada nas facturas consulares, qualquer que seja a sua procedencia.

Assim, o *arroz* procedente de Bremen, mas declarado na factura consular ser da India ; o *bacalhau* proveniente de New-York, originario da Terra Nova, figuram nesta estatistica como importação não de Bremen ou de New-York e sim da India e Terra Nova.

Nesta conformidade, a estatistica brazileira por origem abrange tanto a importação directa como a que vem em transito por outros paizes.

Esta ultima é muitas vezes consideravel, o que faz com que a estatistica brazileira de importação deixe de corresponder com a de exportação de certos paizes estrangeiros para o Brazil.

O seguinte facto observado servirá para exemplo:

Em 1902 importou-se 9.318.623 kilos de batatas de origem franceza, sendo 6.563.895 kilos directamente e 2.755.028 kilos indirectamente da Inglaterra, Portugal, Montevidéo, Buenos Aires, etc.

Entretanto a estatistica franceza dá apenas á exportação para o Brazil 5.584.600 kilos.

Destino das mercadorias — O destino das mercadorias é a estação aduaneira indicada na factura consular para onde são ellas consignadas sem considerar-se o destino ulterior onde a mercadoria entra no consumo.

Esta estatistica não póde discriminar o verdadeiro movimento por Estado, e sim apenas a quantidade e valor importado nos portos de cada Estado, seja para seu proprio consumo, seja em transito para outro Estado.

Assim, entre as mercadorias importadas no Recife figura grande quantidade destinada ao consumo de Alagôas, Sergipe, etc., facto que se observa tambem quanto ao Rio de Janeiro (Capital Federal), que recebe quasi todas as mercadorias destinadas aos Estados de Minas, Goyaz e Rio de Janeiro e em menor escala para quasi todos os outros Estados da União.

Exportação

Os algarismos destas tabellas representam todas as mercadorias de producção nacional ou nacionalisadas exportadas para paizes estrangeiros, com excepção das que constituem o commercio interestadoal, denominado de cabotagem.

As quantidades são obtidas das declarações feitas nos manifestos dos navios que sahem de portos brazileiros para o exterior da Republica.

Os valores são, como os da importação, dados em papel-moeda e em ouro.

O elemento que serve de base para o calculo dos valores é o preço corrente da mercadoria na praça exportadora, accrescido dos impostos estaduaes de exportação e das despezas fixas até a bordo.

Cambio

As tabellas e mappas correspondem ás taxas médias mensaes á vista officiaes, de accordo com os dados fornecidos pela Camara Syndical dos Corretores de Fundos Publicos.

Movimento maritimo

As suas tabellas são organizadas de conformidade com as listas recebidas das capitanias e alfandegas dos portos da Republica.

A tonelagem das differentes embarcações é a tonelagem liquida de registro.

INTRODUCÇÃO

O commercio exterior do Brazil, durante o anno de 1909, comparado com o de 1908, apresenta o seguinte movimento, exclusive metallico:

MERCADORIAS

	MIL RÉIS PAPEL		MIL RÉIS OURO	
	1908	1909	1908	1909
Importação	567.271:636$	592.875:927$	315.479:204$	330.127:589$

Equivalente em £. . .	. . . . .	. . . . .	79.646.690	100.363.794

Como se vê, houve um augmento de 336.403:950$ em 1909 em papel, [e 188.596:473$, em ouro, ou, ao cambio de 27 dinheiros por mil réis, £ 21.217.104.

Os valores da importação em 1909, comparados com os de 1 908, apresentam uma differença para mais de 25.604:291$ em moeda papel ou em £ 1.647.944, e a exportação tambem para mais 310.799:659$ ou £ 19.569.210. O saldo, por conseguinte, entre a exportação e a importação em 1909, é representado pela quantia de 423,714:343$ em moeda papel, equivalente a libras esterlinas 26.585.086, superior ao de 1908, que foi de 138.518:975$ papel e £ 8.663.870.

Em 1909 o nosso intercambio com os differentes paizes estrangeiros foi, discriminado por paizes, o seguinte:

ALLEMANHA	VALOR EM MIL RÉIS PAPEL	MIL RÉIS OURO	£
Importação da.	92.340:923$	51.420:189$	5.784.771
Exportação para.	158.689:250$	88.392:478$	9.944.154

A importação da Allemanha em 1909 foi maior do que em 1908 de 8.081:788$, papel, para o que concorreram as seguintes mercadorias: *chumbo em barra* com mais 107:000$; *cobre e suas ligas*, em bruto, 148:000$; *cores de anilina*, 100:000$; *cimento*, 190:000$; *pelles e couros preparados*, 1.322:000$; *armamento e munições de caça e guerra*, 12.574:378$; *manufacturas não especificadas de cobre*, 151:000$000. As que soffreram diminuição em seus valores foram: *manufacturas de algodão*, 14.886:000$; *manufacturas de ferro e aço*, 2.796 000$, notadamente em *trilhos*, *talas de junção* etc. com menos 1.617:000$; *manufacturas de lã*, 885:000$ e outras com menores quantias.

O augmento da exportação, representado pela quantia de 47.363:400$, foi devido principalmente ás mercadorias: *couros*, 5:146:000$, especialmente *couros vaccuns* salgados e seccos; *areia monazitica*, 450:000$; *café*, 39.269:000$; *farelos*, 568:000$; *fumo*, 3.155:000$, sobretudo em folha.

A diminuição nos valores das mercadorias da nossa exportação para Allemanha não é muito apreciavel; nenhuma attingiu a somma superior a 200:000$000.

A importação de especie metallica subio a 6.065:623$ contra 128:664$ em 1908, £ 380.900.
